Email: ali0.0kh1380@gmail.com

Profile

Python developer focused on asynchronous backend systems, Telegram and MTProto automation, developer tooling, and retrieval systems. I work on practical systems engineering and study psychology alongside software development.

Selected Public Projects

ComputerPilot MCP

https://github.com/dibbed/computerpilot-mcp

Cross-platform MCP runtime with typed tools for files, terminal, Git, code intelligence, browser automation, testing and durable workflows. Includes restart recovery and operational safety controls. Native desktop UI automation is supported on Windows.

TenantRAG

https://github.com/dibbed/tenant-rag

Multi-tenant retrieval framework built with FastAPI. Provides authenticated tenant isolation, partitioned vector stores, tenant-scoped semantic caching and API key hashing.

Psychology Atlas

https://github.com/dibbed/psychology-atlas

Persian-first educational psychology platform with Django and Next.js. Includes knowledge graphs and sourced reference sections covering brain anatomy and assessment instruments. Educational rather than diagnostic.

Telegram Voice Streaming Engine

https://github.com/dibbed/tg-vc-player-saas

MTProto voice streaming project with session coordination, Redis, PostgreSQL, FFmpeg audio processing and recovery workflows.

Smart Periodic Table

https://github.com/dibbed/smart-periodic-table-fullstack
Live demo: https://dibbed.github.io/smart-periodic-table-fullstack/

React and Three.js interactive chemistry explorer with 118 elements, 3D visualization,

search and quizzes. The public GitHub Pages demo is frontend-only.

TTSKit

https://github.com/dibbed/TTSKit-multi-engine-tts

Multi-engine text-to-speech toolkit with Persian support, FastAPI, command-line interface, Telegram adapters, caching and FFmpeg audio conversion.

CLI Orchestrator

https://github.com/dibbed/cli-orchestrator

Python tool separating task coordination from isolated worker execution, including timeout and error handling.

Other Public Repositories

- Nginx SSL Auto: https://github.com/dibbed/nginx-ssl-auto
- IranConcert Scanner: https://github.com/dibbed/iranconcert_scanner
- JobVision Auto-Apply: https://github.com/dibbed/jobvision-auto-apply
- Redis and Mongo Backup: https://github.com/dibbed/redis-mongo-backup-tool

Engineering Focus

- Python, asyncio, FastAPI, Django, Telegram MTProto, Playwright and MCP
- PostgreSQL, Redis, SQLite, vector retrieval and tenant-scoped APIs
- Windows, Linux, Docker, Nginx, Git and CI workflows
- TypeScript, React, Next.js and Persian-first learning interfaces
- Input validation, access control, API key handling and automated tests

Education

Psychology studies (in progress): Islamic Azad University, Gorgan

Software engineering: independent learning and public project work
